HKVCA Luncheon Talk - 17 September, 2019

Michael Steinkuhl, Associate Director, Eze Castle Integration

As Associate Director of Eze Castle Integration's network in Asia, Michael Steinkuhl oversees service and business development across Asia-Pacific from the global managed IT services provider's Hong Kong office. Michael's expertise lies in tailoring services to meet the individual IT needs of firms operating in the financial services industry. Michael acts as an external CTO to multiple hedge funds, private equity firms and family offices, to help align business requirements to their IT strategy.

With 15 years of global experience in the IT sector, Michael has held numerous positions of responsibility prior to joining Eze Castle Integration last year. Successfully managed and delivered projects include the roll-out of SAP to factory in China, a large-scale global Virtual Desktop roll-out and a migration from Novell Directory Services to Microsoft Active Directory environment.

Michael's academic accolades include a MBA from Royal Holloway, University of London, and a bachelor of science in Business Management, from London School of Economics.

In addition to this, Michael has continued to expand his skillset by working towards many technology specific certifications such as VMware ESX Professional, Citrix Certified Administrator and ITIL foundation.

Go Ato, Client Technology Manager, Eze Castle Integration

As one of Eze Castle Integration's dedicated Client Technology Managers for the Asia region, Go provides clients with ongoing support around all decisions to do with their technology and infrastructure. Through regular meetings and assessments, Go works with clients to ensure their technology is aligned with the overall strategic goals and direction of the organisation, as well as to boost operational efficiency.

Go graduated from Queensland University of Technology in Brisbane, Australia. And has had a long spanning career in technology support across Australia and Hong Kong, having worked at PTS Consulting and Verizon Enterprise Solutions.

Go has continued to build his knowledge and technical skillset with numerous VMware and Microsoft licenses and certifications.
